1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach nor fairly suggest a wire management grommet in the entire claimed combination including ~~a first~~ an outer peripheral member and an inner perforate member; said outer peripheral member being constructed and arranged to frictionally engage a planar surface, said member being formed from a first material having sufficient mechanical stiffness for effective frictional engagement; being overmolded about said outer peripheral member to form a unitary wire management device, and being formed from a second material having sufficient flexibility to permit passage of disparate cable combinations; said inner perforate member ~~said inner perforate member~~ having a plurality of radially extending slits incorporated therein and extending there-through, said slits constructed and arranged in one to one correspondence with a plurality ^{of} radially dispersed openings constructed and arranged strain-free engagement of plural disparate cable combinations whereby each radial slit extends from a center point and intersects a dispersed opening, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark A. Williams whose telephone number is (703) 305-3438. The examiner can normally be reached on Monday through Friday.
